EDUCATION

McGill University

B.Sc. Computer Science GPA: 3.78

Sep 2020 — Apr 2025

EXPERIENCE

Associate Software Engineer

UKG — Montreal, QC

Mar 2025 — Present

- Architected a high-performance UI component library for the UKG Schedule Generator using a novel heuristic, reducing engine latency by **30 seconds** for enterprise-scale clients.
- Engineered an AI-driven self-scheduling feature enabling employees to automate shift requests via a single-click interface with intelligent historical preference selection.
- Revitalized the employee search interface with optimized filtering logic, significantly reducing search friction in enterprise-scale workforce management modules.
- Implemented a dynamic CSS recalculation engine resolving cross-device display bugs, ensuring **100% visual integrity** across diverse hardware.

Software Engineer

Onyx Technologies — Montreal, QC

May 2024 — Feb 2025

- Architected a Machine Learning pipeline to extract and format enterprise data for model training, exposing predictive insights through a scalable RESTful API.
- Engineered a reusable "Help & Guidance" framework with context-specific modals and video tutorials, accelerating user onboarding across all custom UI components.
- Designed a personalized recommendation engine to match users with optimal business units using individual preference profiles.
- Enhanced front-end speed by **66%** by designing and customizing Lightning Web Components (LWC) with ES6+ and data-fetching optimization.

Software Developer Intern

Clinia — Montreal, QC

Jan 2023 — May 2023

- Revamped scraping algorithms using C# and ASP.NET, reducing resource consumption by **30%**.
- Developed and maintained multiple ETL pipelines to ensure data workflow stability.
- Improved code quality by writing testable code covering critical edge cases with robust exception handling.

PROJECTS & OUTSIDE EXPERIENCE

Questly | *React Native, TypeScript, Puzzle Engine, Procedural Generation*

Jan 2026 — Present · Lead Developer

- A gamified daily challenge platform with a suite of interactive logic games. Features a "Playful but Minimal" UI with smooth animations and a synchronized global daily challenge using seeded randomness.

FaceScan | *React Native, Expo, TypeScript, Supabase, Gemini API, RevenueCat*

Nov 2025 — Present · Lead Developer

- A cross-platform AI wellness tracking app using facial analysis to generate personalized health insights. Features a serverless backend, real-time dashboards, push notifications, and monetization via RevenueCat.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C#, HTML / CSS

Frameworks & Libraries: React, React Native, AngularJS, ASP.NET, Expo

Tools & Platforms: Git, Supabase, Salesforce LWC, RESTful APIs, RevenueCat
